

Welcome to the New Virtual Machine Wizard

What type of configuration do you want?

☒ Typical (recommended)

Create a Workstation 17.5.x virtual machine in a few easy steps.

☐ Custom (advanced)

Create a virtual machine with advanced options, such as a SCSI controller type, virtual disk type and compatibility with older VMware products.

Guest Operating System Installation

A virtual machine is like a physical computer; it needs an operating system. How will you install the guest operating system?

Install from:

☐ Installer disc:

No drives available

☒ Installer disc image file (iso):

C:\Users\Administrator\Downloads\CentOS-7-x86_64 ▾

Browse...

 CentOS 7 64-bit detected.

This operating system will use Easy Install. [\(What's this?\)](#)

☐ I will install the operating system later.

The virtual machine will be created with a blank hard disk.

Name the Virtual Machine

What name would you like to use for this virtual machine?

Virtual machine name:

Location:

The default location can be changed at Edit > Preferences.

Specify Disk Capacity

How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB):

Recommended size for CentOS 7 64-bit: 20 GB

- ☐ Store virtual disk as a single file
- ☒ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

Base Environment

- ☐ **Minimal Install**
Basic functionality.
- ☐ **Compute Node**
Installation for performing computation and processing.
- ☐ **Infrastructure Server**
Server for operating network infrastructure services.
- ☐ **File and Print Server**
File, print, and storage server for enterprises.
- ☐ **Basic Web Server**
Server for serving static and dynamic internet content.
- ☐ **Virtualization Host**
Minimal virtualization host.
- ☒ **Server with GUI**
Server for operating network infrastructure services, with a GUI.
- ☐ **GNOME Desktop**
GNOME is a highly intuitive and user friendly desktop environment.
- ☐ **KDE Plasma Workspaces**
The KDE Plasma Workspaces, a highly-configurable graphical user interface which includes a panel, desktop, system icons and desktop widgets, and many powerful KDE applications.

Add-Ons for Selected Environment

- ☐ **Backup Server**
Software to centralize your infrastructure's backups.
- ☐ **DNS Name Server**
This package group allows you to run a DNS name server (BIND) on the system.
- ☐ **E-mail Server**
Allows the system to act as a SMTP and/or IMAP e-mail server.
- ☐ **FTP Server**
Allows the system to act as an FTP server.
- ☐ **File and Storage Server**
CIFS, SMB, NFS, iSCSI, iSER, and iSNS network storage server.
- ☐ **Hardware Monitoring Utilities**
A set of tools to monitor server hardware.
- ☐ **High Availability**
Infrastructure for highly available services and/or shared storage.
- ☐ **Identity Management Server**
Centralized management of users, servers and authentication policies.
- ☐ **Infiniband Support**
Software designed for supporting clustering and grid

The KDE Plasma Workspaces, a highly-configurable graphical user interface which includes a panel, desktop, system icons and desktop widgets, and many powerful KDE applications.

Add-Ons for Selected Environment

- ☒ **Remote Management for Linux**
Remote management interface for CentOS Linux, including OpenLMI and SNMP.
- ☐ **Resilient Storage**
Clustered storage, including the GFS2 file system.
- ☐ **Virtualization Client**
Clients for installing and managing virtualization instances.
- ☐ **Virtualization Hypervisor**
Smallest possible virtualization host installation.
- ☐ **Virtualization Tools**
Tools for offline virtual image management.
- ☒ **Compatibility Libraries**
Compatibility libraries for applications built on previous versions of CentOS Linux.
- ☒ **Development Tools**
A basic development environment.
- ☒ **Security Tools**
Security tools for integrity and trust verification.
- ☐ **Smart Card Support**
Support for using smart card authentication.
- ☒ **System Administration Tools**
Utilities useful in system administration.

Press Ctrl+Alt to release the mouse cursor

Install CentOS 7 64-bit as you would on a physical computer. When you are done and the operating system boots up, click "I Finished Installing".
